Hi David –

Please see below email from Jim. Sounds like he does have some interest to be on the panel but has some concerns about the focus of the meeting; he is not sure if he is the right person for the research/technical slot. Can I stop by after my SWP call (around noon) to check in quickly on this? I am not sure exactly what Jim would be barred from discussing. I fully understand that Jim will be on the panel as a private individual.

Kate

Hi Jim –

I have a call in a few minutes. Can I call you when I get off? Will be around 12:30 pm PST.

Thanks. Kate

Hi Kate,

Would Wednesday morning be convenient for a call, say 9 or 10 am your time? Let me know if that works or if later would be better for you.

I noticed that the discussion is more about hydraulic fracturing than the CDOGGR report. Hydraulic fracturing was not a significant topic in the CDOGGR report. I have a technical interest in hydraulic fracturing, but not sure I would be the right person for the panel. I drafted a “white” paper on mechanical integrity issues related to HF operations and wells for Horsley Witten, under a contract with EPA HQ, two years ago. However, my research did not involve other concerns such as microseismicity, possible groundwater impacts and monitoring, and other issues related to HF operations.

Nonetheless, I would be happy to participate as a panelist if my limited qualifications are acceptable and I feel that I could add value to the discussion.

Thanks,

Jim

Hi Jim –

Below is a summary of the call I had with Kit Stolz last week. Do you have a few minutes to talk about this?

Thanks. Kate

David –

I spoke to Kit Stolz this morning. Here's a summary of our conversation:

Kit is a reporter and last year did a story on fracking. For this event, he is representing Ojai Chautauqua group (<http://ojaichautauqua.org/>).

Event: The Future of Fracking, An Exploration of Issues and Answers (see Save the Date webpage: <http://ojaichautauqua.org/>)

Date: November 9, 2014 (4:30 – 7:00 pm)

Location: Ojai Valley Inn

Purpose: Trying to come to a consensus. For example: Is fracking good or bad? Put the facts into a public debate.

Audience: mostly local but open to the public

Panelist: Looking for 5 people: 1) Scientist Pro-Fracking (TBD), 2) Scientist Anti-Fracking (Craig Nickolson UCSD), 3) Industry (Tucker Hall, Western States Petroleum), Environmentalist (TBD – but has invited the gentleman who authored SB4, Ca Fracking Bill), 4) [neutral] Researcher (invitation to Jim Walker), 5) Moderating (Kit)

Structure of meeting: Presentations (more like illustrations and talking points) and a panel. All panelist will be asked to bring slides/material.

He asked if I was interested to participate and I said no. He did not specifically ask EPA to be on the panel.

I said I need to discuss the Jim Walker invitation with you to see if it would be appropriate for him to participate.

Kate

Thanks Geraldine. I will contact Kit Stolz tomorrow to get more information about his request.

Hi Kate:

As we briefly discussed, we were approached by a gentleman by the name of Kit Stolz, who is trying to organize a public discussion group and is looking for panelists. He would like to include Jim Walker as a panelist due to his work on the Class II CDOGGR evaluation, but I am not sure of the exact context – technical, political, or otherwise, so I feel like EPA should be involved in the discussion to see if Jim would be the best person. They are looking to hold this sometime in November.

Kit Stolz's contact information is:

Ex. 6 - Personal Privacy

Please reach out to him directly.

Jim, I copied you on this email to keep you in the loop, as the CDOGGR study was your work.

Best Regards

Geraldine
